

Company Profile

About Us

FG Forrest was established in 1996 and is one of the leading suppliers of web and e-commerce solutions in the Czech Republic today. We develop extensive B2C/B2B e-shops, web presentations, online applications and intranets. We focus on technology-intensive solutions based on CMS & the Edee.one e-commerce platform, often by integrating them with external sys-

tems. For example, our creativity, precision and long-term support are the reasons why the ČEZ Group, Kooperativa insurance company, Bernard brewery, Moser, RAKO and the Office of the President of the Republic work with us. We have created dozens of award-winning and commercially successful projects for these and other clients.
