

# ANO

Website of the political movement and more than 230 regional and senator websites

## A spick-and-span website

We created a clear, minimalist website for the political movement ANO, which sufficiently highlights the daily-updated content in the form of texts, pictures and videos. The website solution, which helped the successful movement to communicate, e.g. with voters and media, came first in the 2013 Internet Effectiveness Awards Competition.

We built the website on the latest version of the Edee CMS, which manages quick and effective workflow for approval of contributions and the administration of the other 230 local pages.
