Intranet of ČEZ

The website for internal communication of 20 thousand users of the ČEZ Group

Editorial system for 200 editors

CLIENT OF FG FORREST
2006
SINCE

Easy communication inside a company

The extensive intranet of ČEZ, which we started developing in 2007, has to manage up to 30 thousand pages, three times more documents and a half million visits every month. Since then it has gone through a number of innovations in the form of an internal Wikipedia and a video portal.

We built the intranet of the ČEZ Group on the Edee CMS, which meets the highest demands for both effectiveness and security of shared data.
