groups of users with 566 locations
and personalized content

100,000

saved pages, 50 thousand
documents, 90 thousand images

50,000

email notifications per month

48%

faster searches

What does the client say about us?

www.cez.cz

"We especially appreciate the option to personalize the intranet homepage, allowing each user to display information about topics related to their work. For the employer, this represents ideal targeting of information towards specific employees. This as well as other functions of the content management system leads to significant savings in intra-company communication. The creation of new web pages or microsites and defining their target audience is really simple."

Ing. Hana Boušková,
ČEZ Group Intranet Administrator
