

Office of the President of the Republic

Official website of the Office of the President of the Czech Republic and Prague Castle

Prague Castle at your fingertips

We created for the Office of the President of the Republic a representative website, introducing both the President's activities and the beauty of Prague Castle. Visitors may enjoy it via a virtual tour – a mobile version is also available.

The whole website runs on the Edee CMS publication system, which enables easy and quick administration of the content.
